CRYOVEST®

A cooling vest high performing perfect for workers who are exposed to great heat sources and face problems linked to thermal stress

INCLUDING THE LONG LAST COLD

FIRSTICE®
TECHNOLOGY

ADVANTAGES OF CRYOVEST®

- *Human advantages*
 - > Maintain a constant level of heart rate
 - > Stabilize the water status
 - > Improve the heart rate
 - > Improve the thermic comfort
- *Material*
 - > Maintain and restore some cognitive functions
 - > **HELPFUL FOR THE SAFETY AND PRODUCTIVITY**
 - Less loss of concentration so less risk of workplace injuries or risk of mistakes

PRODUCT CHARACTERISTICS

- *Lightweight*
Less than 2 kg
- *Ergonomic and Comfort*
Not restrict or impede movement
- *High Quality Cold*
A non aggressive cold over a long duration due to its unique patented snow cold technology used in medical
- *Long lasting*
Homogeneous and long cold diffusion (autonomy 90 min.)

HOW TO USE THE CRYOVEST® during work time ?

Wear the vest shirtless or just with a tee shirt.
Depending of the type of work, put on the coveralls.

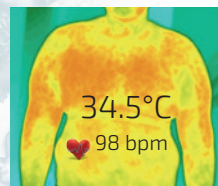

The cold will last around 1:30 (depending of thermic environment (blast furnace, exposed to great heat sources...))

After 1:30 or 2 hours of use, if you want to keep the benefits of the Cryovest®, refill the vest with new cold packs FirstIce® (Easy and quick).

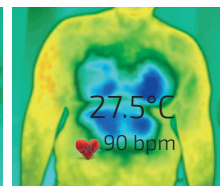

COOLING AND SCIENTIFICALLY RESEARCHES

Thermogram before work

After work
WITHOUT CRYOVEST®

After work
WITH CRYOVEST®

A study made in collaboration with (INSEP) shows that workers exposed to great heat sources are losing concentration and face problems linked to heat stress:
Which can generate water loss but it can be reduced by wearing the Cryovest®.

We can also see that a reduction of differences between the central temperature and the skin temperature at the torso so the physiological mechanisms of thermoregulation are less engaged.

Using the vest allow an improvement in thermal comfort.

Cryovest was created, improved and tested in constant collaboration with researchers at INSEP (Paris) (The National Institute of Sport for Expertise and Performance).
